

AI Disclosure Appendix

February 15, 2026

I have used AI tools **Gemini**, **ChatGPT** for L^AT_EXtemplate generation for my report and understanding the parts of the question which I got confused(especially Phase D) and for learning concepts like Flask and git hash. I have created the structure of an app using this tutorial from online [Flask Tutorial](#) for better understanding and also for code debugging when errors occur. Finally i used AI tools to know the best colour combination that looks good for my website

Here are list of prompts where I used generative AI to assist in the post-mortem report.

1 Prompts Used

- **Prompt :** Draft a L^AT_EXfancy for this project, answering the questions.
- **Tool Used :** Gemini
- **Assignment Section :** Report
- **Prompt :** Please check the paragraph I pasted and correct any grammar or spelling mistakes
- **Tool Used :** Gemini
- **Assignment Section :** Report (This is used multiple times to correct my spelling by adding each section as a paragraph to the LLM)

2 Disclaimer

I have used the AI to understand concepts and the post-mortem report. However, the logic of data versioning and monitoring and all are of my own knowledge never used generative AI
